PLATFORM AVAILABILITY AND FUTURE SUPPORT

The proposed ACSL MEL System is designed as a **cross-platform solution**, ensuring consistent access across devices and operating systems.

Current Access (Prototype Phase)

Android: Available via direct APK installation https://apps.mel.titus.co.ke/playstore

Web Application: Accessible via modern browsers at https://apps.mel.titus.co.ke/web

Planned and Supported Platforms (Further Development)

Android (Play Store distribution)

iOS (Apple App Store distribution)

Web Desktop on **Windows, macOS, and Linux**

Web Mobile Browsers across supported devices

The system architecture supports unified deployment across these platforms, enabling scalability and consistent user experience for both field and management users as the solution matures beyond the prototype stage.
